

Modul-Connect THE POWER OF WIRELESS

New Modul-Connect system featuring:

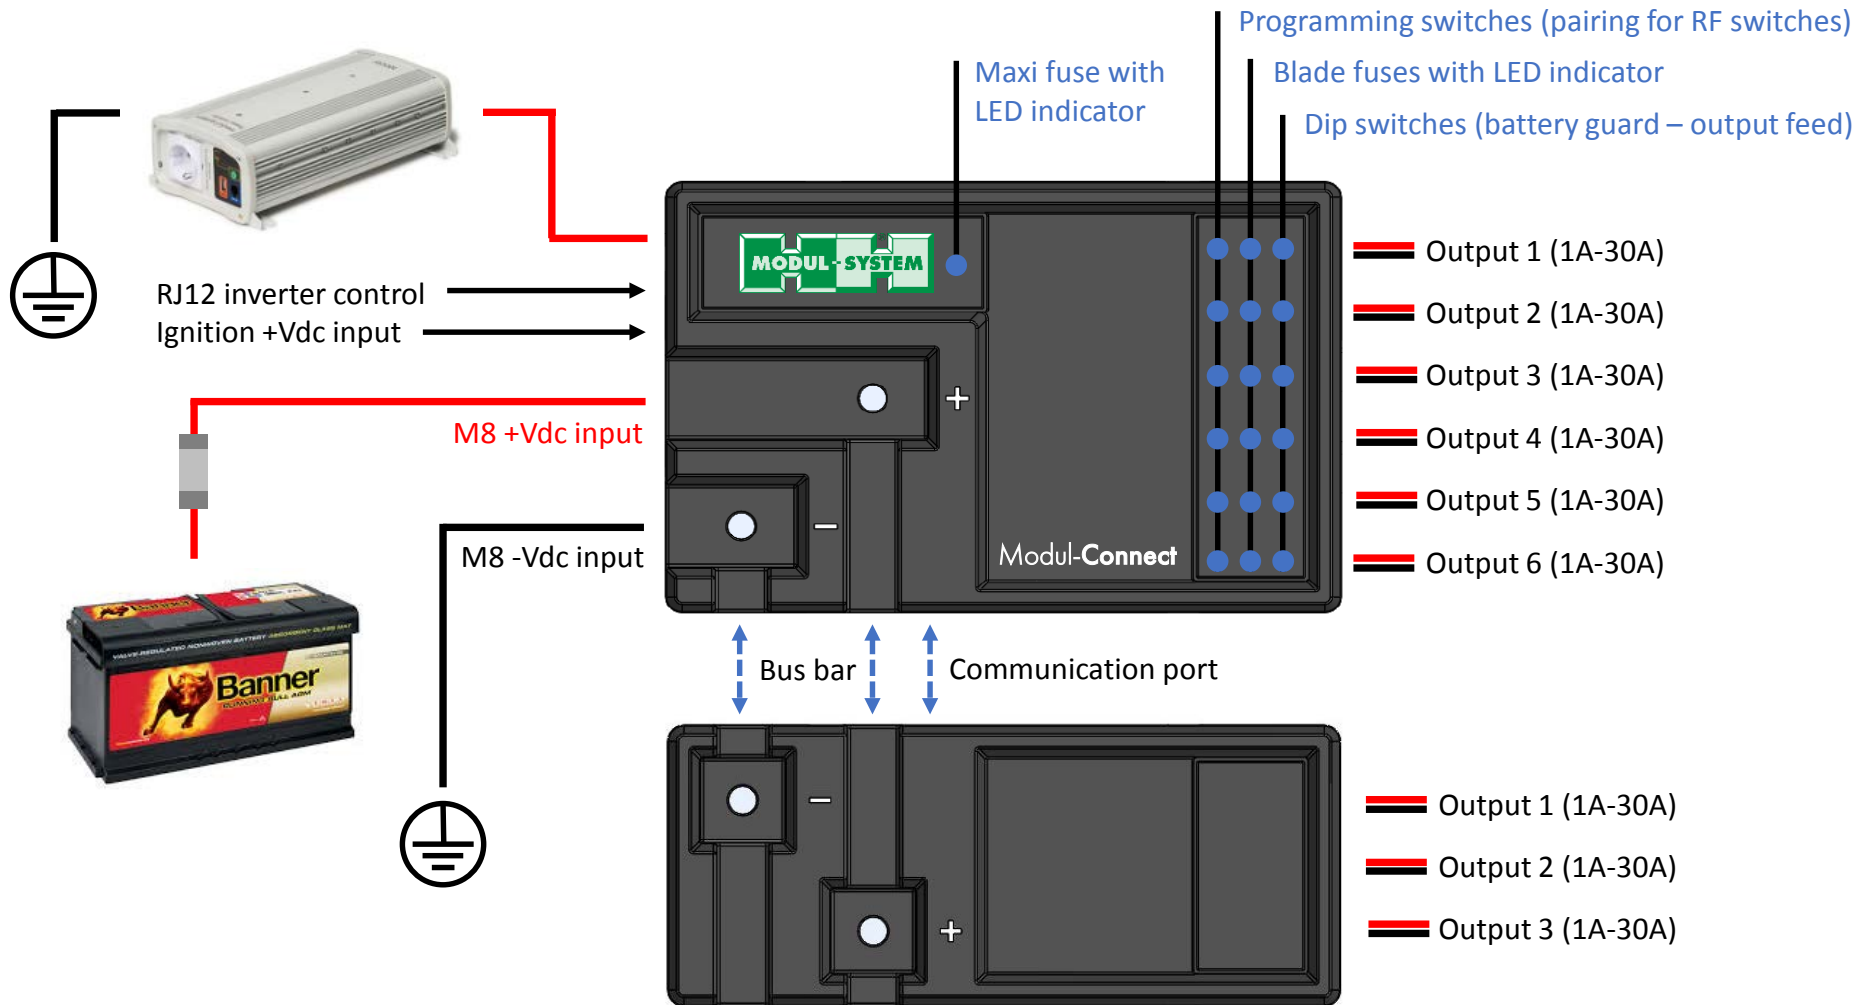

- Wireless RF switches
- Bluetooth control
- 3G/SIM solution

- High-capacity outputs
- Battery guard and fusing
- No complex programming
- Can be expanded with more outputs and functionality

- For now: Made for Europe only!

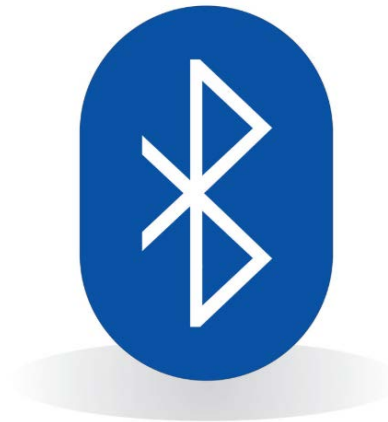

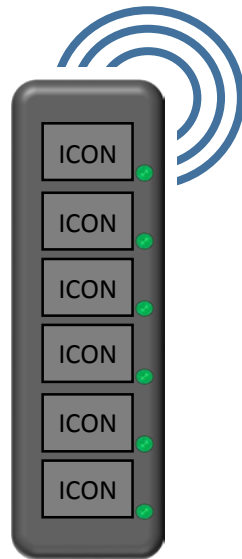

System overview

System features

- Battery guard & output feed
- Fusing
- RF switches
- Bluetooth
- 3G / SIM

Battery guard & Output feed

- No complex programming

Battery guard

- Individual settings for each output
- Set to: None - 10.5Vdc - 11.7Vdc - 12.2Vdc

Output feed

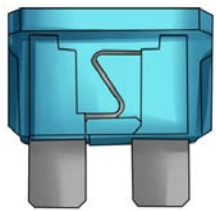

- Individual settings for each output
- Set to:
 - Off
 - On permanent
 - Ignition on/off
 - Ignition on / 30 minutes off
 - Switched via RF/Bluetooth

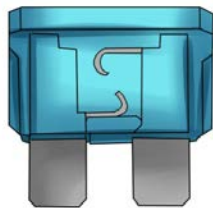

Fusing

- Blade fuses for 1-30A outputs
- Maxi fuse for inverter
- LED indicator on box
- Warning in app / on screen

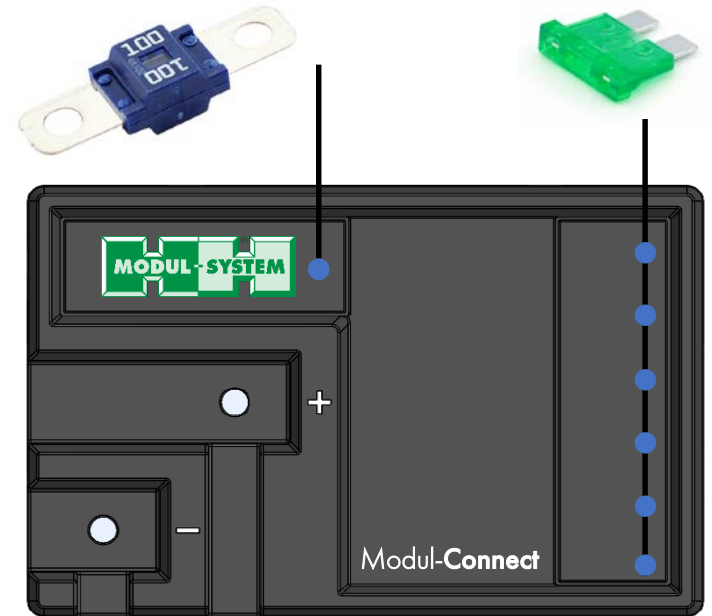

Select proper sizes fuse for each output!

Good fuse

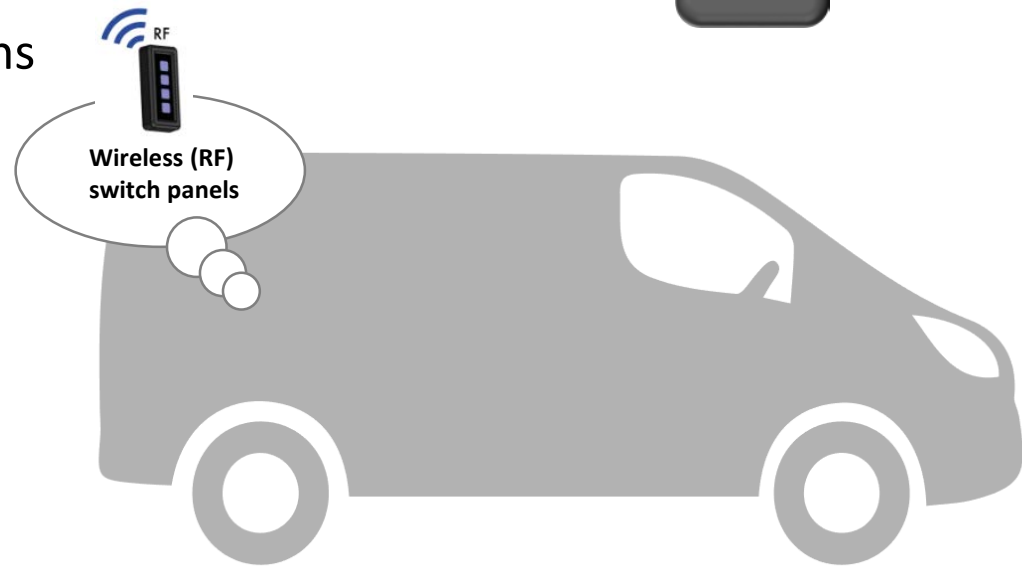

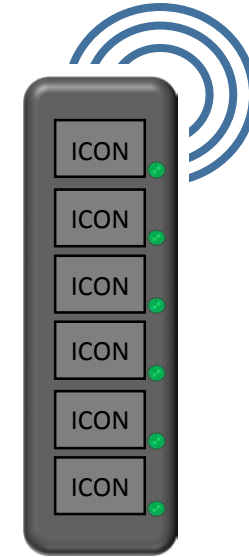

Bad fuse

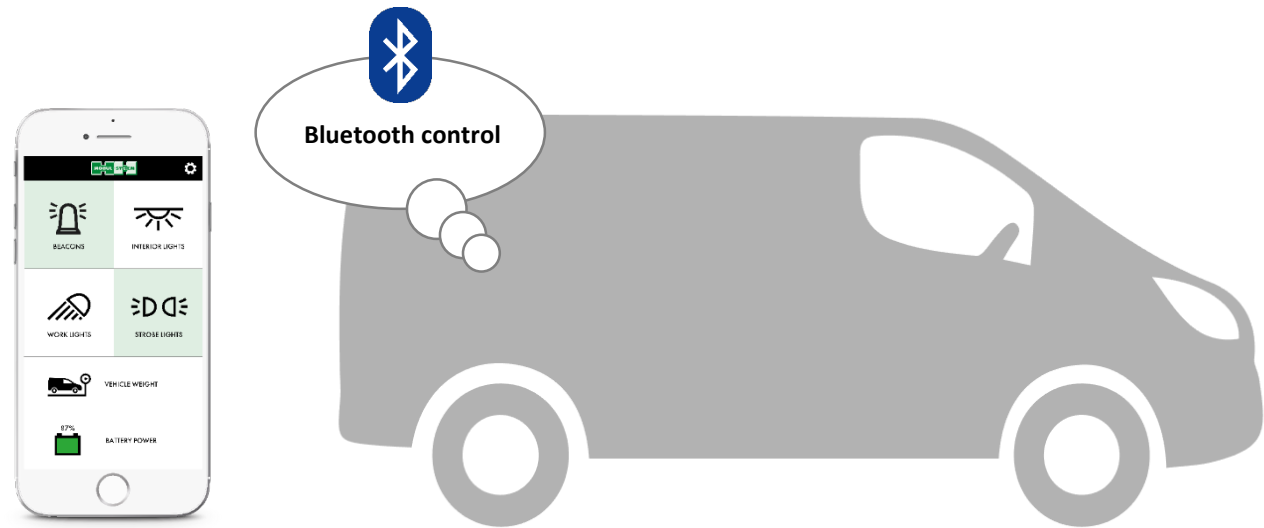

RF switching

- Powered by batteries (at least 3 years)
- Communication through RF (radio frequency)
- Paired with selected output upon installation
- Communication between switches + LED indicator
- Reduced wiring →
quicker and simpler installations

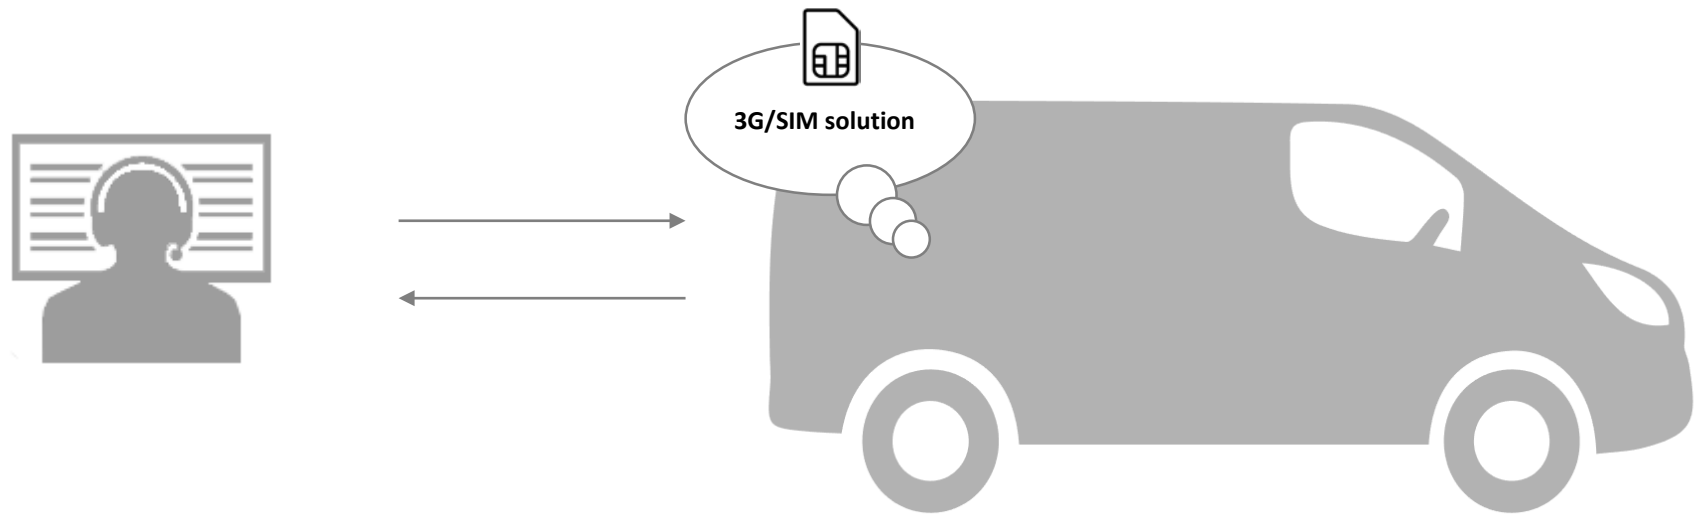

Bluetooth

- Long-range Bluetooth (100 m)
- Switch on/off lights and other equipment using your phone
- Works together with RF switching
- Communication from box to screen

3G/SIM solution

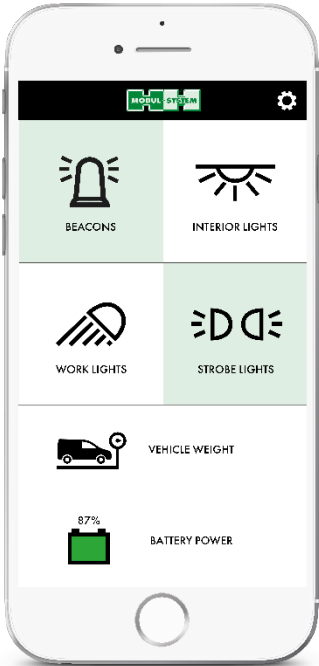

- Manage connected accessories from remote location
- Submit information between vehicle and office
- Works together with RF switching / Bluetooth
- WiFi hotspot in and around the vehicle
- Telematics

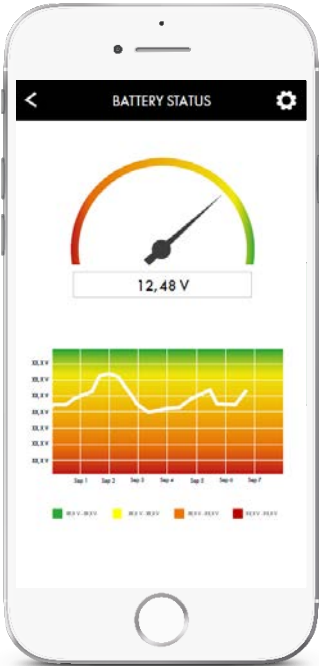

Modul-Connect App

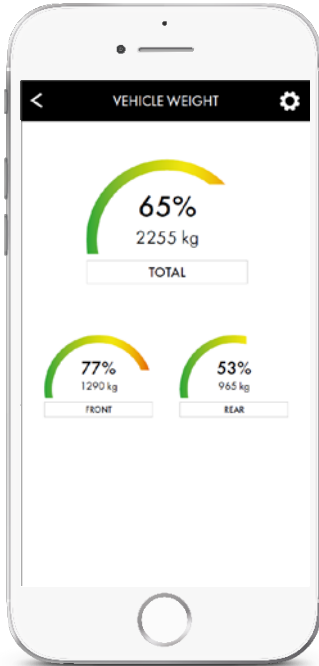

- Free to download from AppStore / GooglePlay
- Pair with your vehicle / one connection at the time

Manage lights

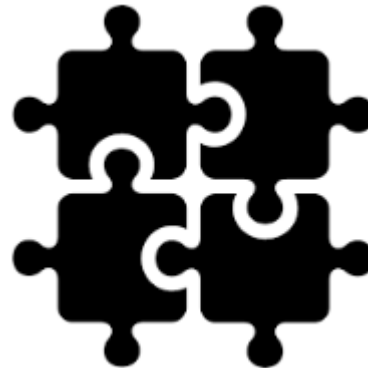

Check battery status

Check vehicle weight

Why this system?

- High power solution suitable for all installations
- No electronic fusing, and no receivers, to save cost
- Individual settings per output
- Reduced wiring time and cost
- Standardization
- Modularity

The future of Modul-Connect

Cameras and screens

Solar panel and charging

Foldable warning signs

Universal Function Switch Packs

PIR sensors

RFID Management, tracking

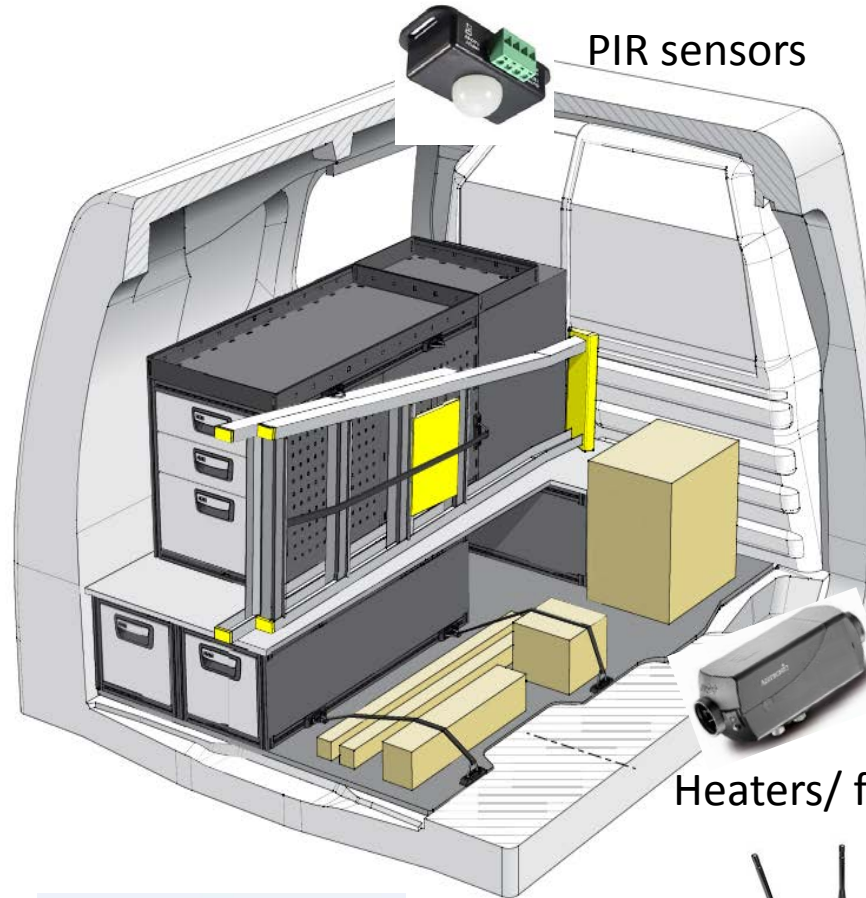

Lock, Alarm, Security

Sensors:

- Gas
- Temperature
- Humidity
- Motion detector
- Power
- Load
- RFID
- Geo fencing

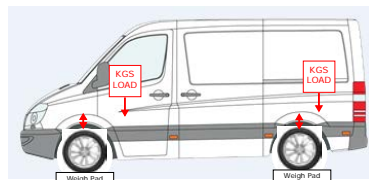

Heaters/ fridge

Load sensor

3/4G WiFi router

Time plan

- Estimated start of sales Q2 2019
